

POWERMAKER HPP

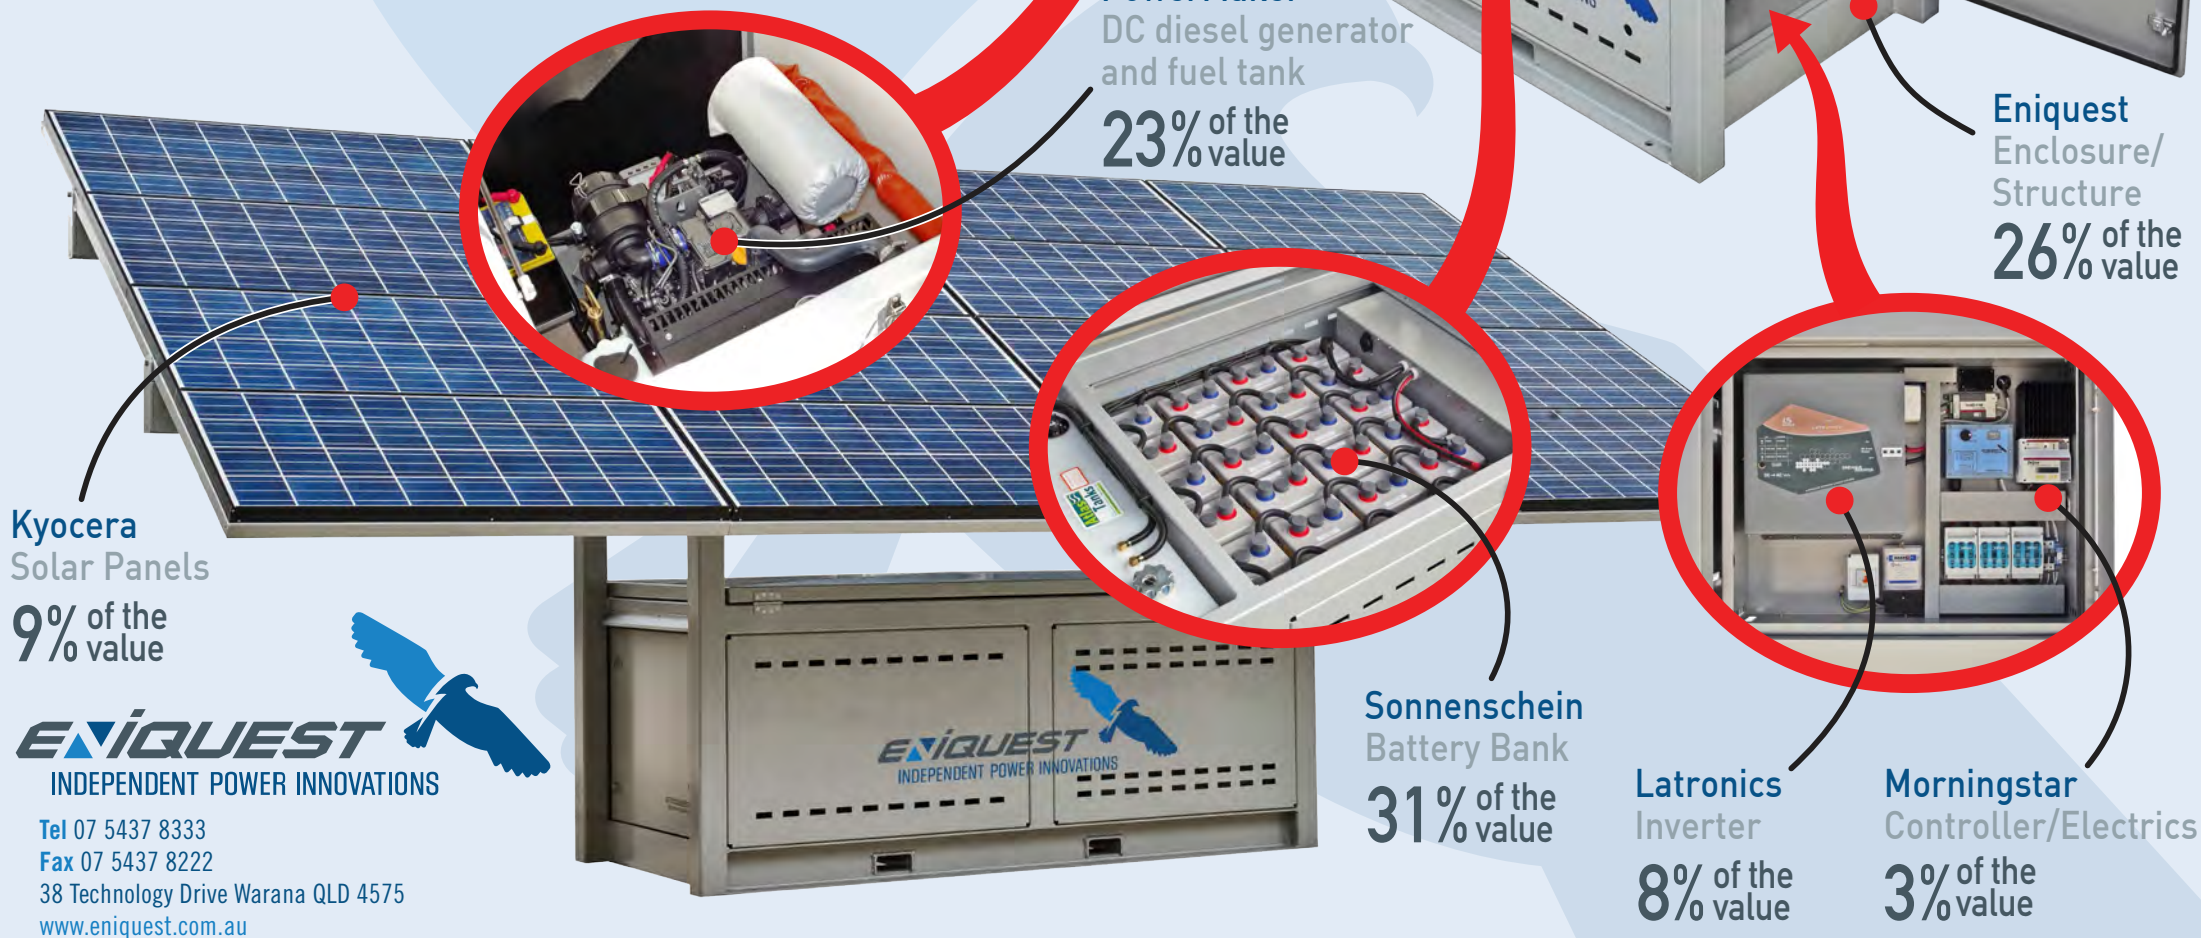

Solar/diesel Hybrid Power Plant

Where is the value in an Enquest PowerMaker HPP?

A PowerMaker HPP is made up of high-quality components that are combined into a single package that is convenient to install, and easy to pick up and move if you ever need to. Just place it in a sunny spot and turn it on, and it provides reliable, clean, and low cost electrical power in all conditions – it's that simple!

And if you want to expand a PowerMaker HPP you can easily do so by adding more solar panels or other renewable energy sources.

You can see what's in a PowerMaker HPP, and the share of the value that's in each component:
